Movavi Editor

### **Type of employment :**

Remote work

### **Education:**

May 2012 - Lviv Polytechnic National University - bachelor's degree

June 2019 - professional courses "3Ds Max+Corona Render"

### **Summary :**

My name is Anna and I specialize in creating photorealistic visualizations of interiors and exteriors.

My approach to work is individual for each project. High speed and quality of work, attention to details and adherence to deadlines. 3D-visualization is the creation of an image of the designed premises, as close as possible to reality. It is this part of the design project that is presented to customers as the most "tidbit" - after all, it allows you to see the "real" look of the future home long before the start of all work.

You can get acquainted with my works here

### **Professional Experience :**

Since the end of 2019, I have been working remotely as a 3D visualizer as a freelancer with countries such as Ukraine, Poland and the Czech Republic.
